SUMMARY

Full Stack Developer with 3+ years of professional experience building robust, scalable web applications using PHP / Laravel on the backend and React.js / Next.js / TypeScript on the frontend.

Experienced in delivering AI-powered features, building RESTful services, designing relational database structures, and contributing to end-to-end product development with strong focus on performance, reliability, and clean architecture.

WORK EXPERIENCE

TGI Pakistan

03/07/2023 – Present

Full Stack Developer (PHP Laravel + React / Next.js)

- Built and maintained Laravel REST APIs consumed by React/Next.js frontends, covering authentication, role-based access control, and resource controllers.
- Designed relational schemas in MySQL / MSSQL and implemented Eloquent models, migrations, and query scopes for reporting modules.
- Integrated AI language model APIs to deliver AI-assisted product features, including structured output processing and conversational interfaces.
- Collaborated on full product delivery from architecture to deployment, supporting business requirements, backend services, and frontend implementation.
- Used GitHub Copilot and AI-assisted development workflows to accelerate implementation and improve productivity.

Pak Soft Technology

16/12/2022 – 31/05/2023

Intern Software Engineer

- Built dynamic web applications using React.js and contributed to PHP backend modules.
- Developed responsive UIs with HTML, CSS, and JavaScript and improved component rendering for better user experience.

PROJECTS

CareerDots – AI Career Guidance Platform

2025 – Present

- Architected a full-stack AI platform with a Laravel PHP backend (REST APIs, MySQL, Sanctum authentication) and a Next.js / TypeScript frontend.
- Integrated AI language model APIs for career-matching, scholarship recommendations, and personalized action plan generation.
- Designed system prompts, JSON schema outputs, and multi-turn conversation state for AI-driven workflows.

DocLinQ – Healthcare Management Platform

03/10/2024 – Present

- Delivered role-based dashboards for Doctors, Patients, Front Desk, and Practice Management using React.js, PrimeReact, MUI, and PrimeFlex.
- Integrated live backend APIs for real-time data updates and supported responsive, production-ready application workflows.

SKILLS

Backend: PHP, Laravel, REST API, Eloquent ORM, Sanctum, Artisan

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, ShadCN UI, MUI, PrimeReact

Databases: MySQL, MSSQL, MongoDB, Eloquent Migrations

AI Integration: Language Model APIs, Prompt Engineering, Structured Outputs, Conversational Workflows

Project Delivery: Agile Development, Scrum, Sprint Planning, Roadmap Execution, Stakeholder Communication

Tools: Git, GitHub, Vite, Postman, GitHub Copilot, Agile / Scrum

EDUCATION

Lahore Garrison University

BS Computer Science

Gold Medalist – Graduated with distinction, awarded Gold Medal for academic excellence.

10/10/2020 – 16/07/2024

AWARDS

- Gold Medal – Lahore Garrison University | Awarded Gold Medal for graduating with the highest academic distinction.
- Vice Chancellor's Award – Lahore Garrison University | 1× Vice Chancellor's Award & 4× Dean's Award for academic excellence and leadership.
